The University of Cologne is one of the largest and most research-intensive universities in Germany, offering a wide range of subjects. With its six faculties and its interfaculty centres, it offers a broad spectrum of scientific disciplines and internationally outstanding profile areas, supported by the administration with its services.

The German Human Genome-Phenome Archive (GHGA) is a project of the NFDI with the goal to archive human high-throughput sequencing data and make them available for secondary research. The University of Cologne is one of six GHGA data hubs that will store genomic data. For the development, installation and operation of the GHGA storage infrastructure in the first half of the project, the University of Cologne looks for an infrastructure DevOps developer (f/m/d). The implementation of interfaces to the West German Genome Center (WGGC) sequencing platform in Cologne for streamlined data submission are also part of the tasks. Based at the Regional Computing Center of the University of Cologne, you will work closely with the departments for high performance computing, operation, and network. You will also join the relevant GHGA working groups.

YOUR TASKS

- » Conduct research about new methods for secure storage, processing, and reuse of highly sensitive research data in a Germany wide resource network while considering regional data protection rules
- » Install and operate the GHGA storage infrastructure at the GHGA Cologne data hub
- » Implement the GHGA data access technical mechanisms at the Cologne data hub
- » Contribute to the relevant GHGA working groups
- » Setup the necessary interfaces to the West German Genome Center (WGGC)

YOUR PROFILE

- » MSc in Computer Science or in the natural sciences with several years of experience in IT administration and conceptual design of similar infrastructure
- » Several years of experience in Linux administration
- » Knowledge about storage systems (e.g. NAS) for larger user groups
- » Knowledge in container technologies
- » Good German and fluent English, spoken and written
- » Open-minded and motivated to push the tasks

Helpful but not required:

- » Knowledge about the implementation of highly secure IT infrastructure and data protection
- » Experience with object storage
- » Knowledge about Kubernetes
- » Experience with microservices
- » Experience with OpenStack
- » Knowledge in network configuration
- » Knowledge about the S3 interface and parallel filesystems

WE OFFER YOU

- » to work in a fascinating project of national importance
- » a diverse and fair working environment
- » support in reconciling work and family life
- » flexible working time models, full-time positions suitable for job sharing
- » extensive advanced training opportunities
- » occupational health management offers
- » local transport ticket at a discount for UoC employees

The position is available from 01.10.2022 on a full-time basis (39,83 hours per week). It is limited to 30.09.2024. If the applicant meets the relevant wage requirements and personal qualifications, the salary is based on remuneration group 13 TV- L of the pay scale for the German public sector.

The University of Cologne is committed to equal opportunities and diversity. Women are especially encouraged to apply and will be considered preferentially in accordance with the Equal Opportunities Act of North Rhine-Westphalia (Landesgleichstellungsgesetz – LGG NRW). We also expressly welcome applications from people with disabilities / special needs or of equal status.

Please apply online at: <https://jobportal.uni-koeln.de> with proof of the sought qualifications. The reference number is Wiss2207-27. The application deadline is 25.08.2022.
